

Steve Williams
President & CEO, Terma North America Inc.

Terma Aeronautics

Steve Williams was appointed President & CEO of Terma North America in August 2016 and appointed to lead the Terma Aeronautics Business Area in May 2017.

He is responsible for the financial performance of Terma's largest business area, Aeronautics, for the operations and business pursuits in North America, and for supporting Terma Global engagements.

About Steve Williams

He is Co-Chairman of the American Danish Business Council and Honorary Chairman of the German American Business Council. He is a board member of Fraunhofer USA and Senior Advisor to the Executive Council on Diplomacy.

Prior to joining Terma, he spent 12 years at Lockheed Martin, where he was President for Continental Europe, responsible for international business development in over 75 countries with 12 field offices, and Regional Executive for Europe, Israel and the Americas.

Prior to joining Lockheed Martin, he was President of a security and telecommunications company, leading business partnerships in the U.S. and Japan. He was a U.S. Army Foreign Area Officer and Combat Arms Officer for over twenty years. He served as a Policy Advisor in the Office of the Secretary of Defense and Joint Chiefs of Staff, where he negotiated European basing agreements and led policy planning for Operation Northern Watch (Northern Iraq).

His international experience includes study abroad, serving in a U.S. Embassy and with the U.S. European Command, and commendation for actions taken under hostile fire.

He is a graduate of West Point with a BSc in Engineering, has a Master's degree in International Economics from Johns Hopkins University, and attended the Greek War College.

(June 2017)

Operating in the Aerospace, Defense, and Security sector, Terma supports customers and partners all over the world.

Our committed employees develop and manufacture mission-critical products and solutions that meet exacting customer requirements.

Our business activities, products, and systems include: command and control systems; radar systems; self-protection systems for ships and aircraft; space technology; and advanced aerostructures for the aircraft industry. Terma has decades of hands-on know-how in supporting and maintaining mission-critical systems in some of the world's most hostile areas.
