Ground Surveillance Radar
SCANTER 1002
Ground Surveillance Radar

The SCANTER 1002 Radar System is tailored for detection and tracking of fast and slowly moving objects in and around high-sensitivity areas and critical infrastructure.

Where traditional electronic perimeter protection solutions typically only monitor outer boundaries and lines, SCANTER 1002 provides complete meter-by-meter coverage both outside and inside a physical perimeter.

Providing 360º surveillance and high update rates, the radar and its embedded tracker deliver constant threat evaluation and behavior analysis of a detected target by determining course, speed, and heading to maximize the time available for assessment, decision, and possible intervention.

Operational Capabilities

Automatic Monitoring
The superb surveillance and tracking capabilities of SCANTER 1002 can be further optimized in combination with an advanced pan-tilt-zoom camera solution, which automatically slews to the radar-detected threat for immediate identification and tracking – reducing operator load to a minimum, compared to a normal CCTV-based surveillance system.

Wide Detection in All Weather Conditions
SCANTER 1002 delivers uninterrupted, all-weather detection and tracking of more than 100 simultaneous tracks ranging from humans, vehicles, and boats, covering an area up to 452 km². SCANTER 1002 is vital for reliable and precise early warning and extended ground surveillance.

Product Characteristics

High Availability
Based on proven Solid State technology, SCANTER 1002 is designed for uninterrupted ground surveillance and availability – meeting the demands for 24/7 infrastructure protection.

Ease of Integration
SCANTER 1002 is easy to integrate and relies on an open architecture and standard IP network to ensure effortless integration to third-party surveillance systems or Terma’s own intelligent wide area perimeter detection solution; T.react CIP. For more information on T.react CIP, visit www.terma.com.

Key Benefits:
- Automatic wide area threat detection and tracking
- Simultaneous handling of more than 100 threats
- Scalable from small installations to border size solutions
- Proven technology built on 60+ years of experience working in harsh environments
- Easy integration to third-party surveillance systems.

Operating in the aerospace, defense, and security sector, Terma supports customers and partners all over the world. With more than 1,500 committed employees globally, we develop and manufacture mission-critical products and solutions that meet rigorous customer requirements.

At Terma, we believe in the premise that creating customer value is not just about strong engineering and manufacturing skills. It is also about being able to apply these skills in the context of our customers’ specific needs. Only through close collaboration and dialog can we deliver a level of partnership and integration unmatched in the industry.

Our business activities, products, and systems include: command and control systems; radar systems; self-protection systems for ships and aircraft; space technology; and advanced aerostructures for the aircraft industry.

Terma has decades of hands-on know-how in supporting and maintaining mission-critical systems in some of the world’s most hostile areas. Terma Support & Services offers Through Life support of all our products to maximize operational availability, enhance platform lifetime, and ensure the best possible cost of ownership.

Headquartered in Aarhus, Denmark, Terma has subsidiaries and operations in the Netherlands, Germany, Belgium, UK, France, UAE, India, Singapore as well as a wholly-owned U.S. subsidiary, Terma North America Inc. Terma North America Inc. is headquartered in Arlington, in the Washington D.C. area, with other offices in Georgia, Texas, and Virginia.
