MARITIME AND NAVAL SYSTEMS SUITE
INTERNATIONAL REFERENCES
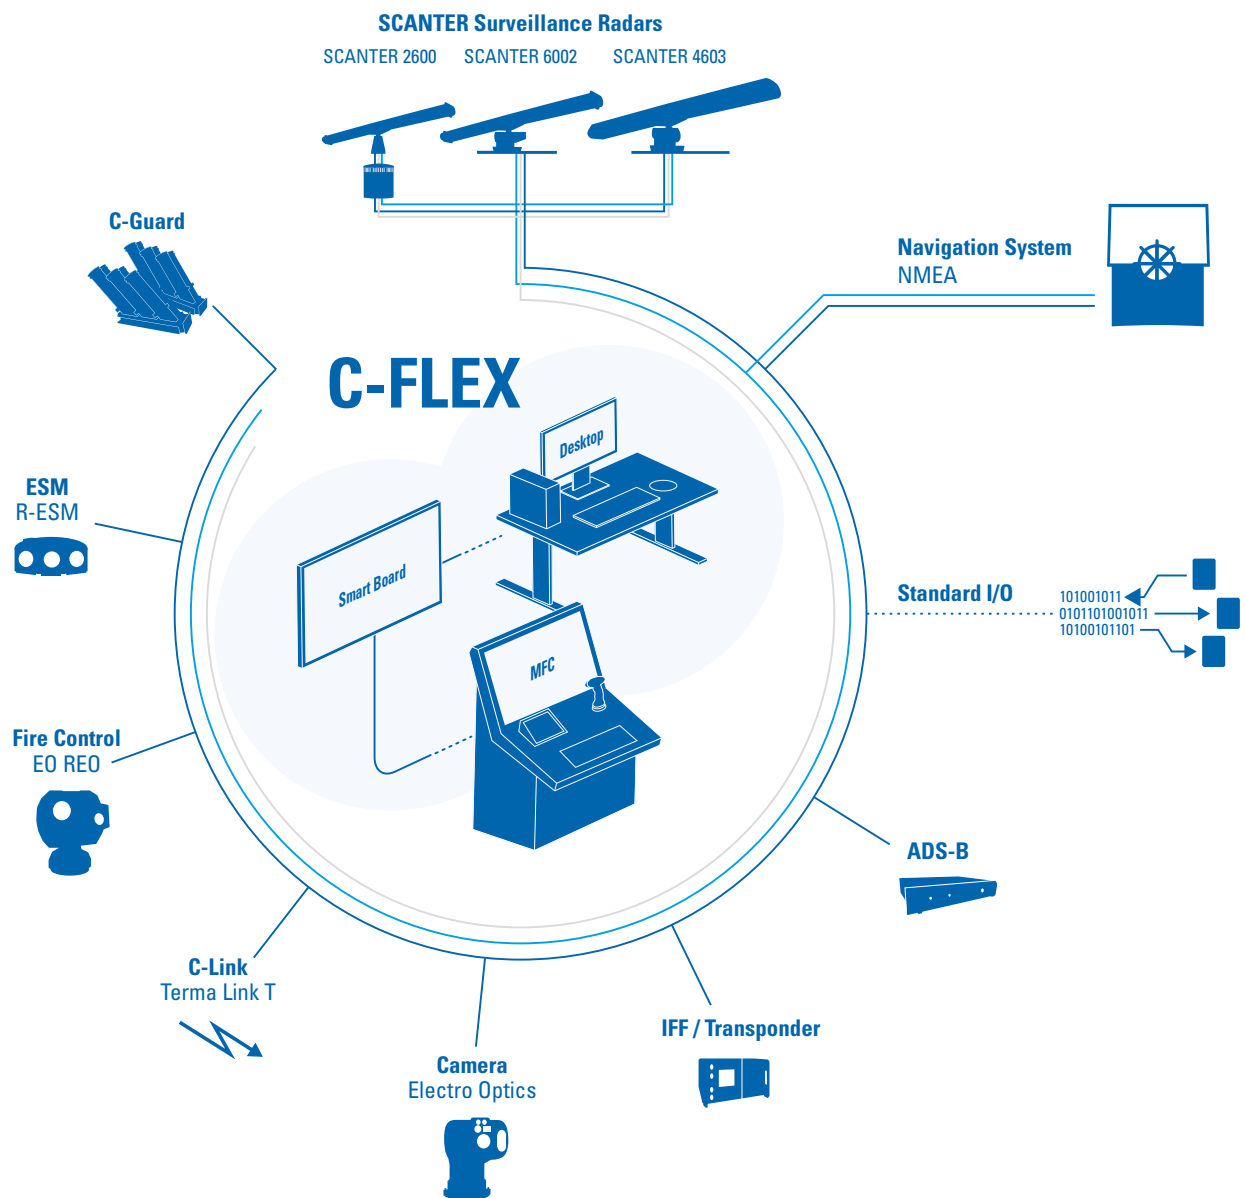

Terma is a Strong International Supplier

The C-Flex Command and Control system is a modern, mission proven solution that puts the operator and operational mission in the center. C-Flex is designed to provide effective and unparalleled tactical awareness within the domains of Maritime Safety, Maritime Security and Power Projection. C-Flex is based on Terma's C2 platform that has been actively developed and matured in close collaboration with the Royal Danish Navy over the past decades and offers a reliable in-service NATO proven Command and Control capability. C-Flex supports a number of integrations to sensors and weapon systems including Terma Naval radars and Deocy solutions.

Terma's SCANTER Naval Surveillance Radars are used by Navies and Coast Guards around the world for protection against asymmetric threats, search-and-rescue operations, and law enforcement tasks e.g. control of illegal immigration, smugglers, and piracy, and as such major contributors to the Situational Awareness picture for all vessels from Border Police and Patrol Vessels to Frigates. The SCANTER radars offer superior detection and tracking of small air and surface targets as well as advanced helicopter control capabilities, also in harsh weather conditions.

C-Guard is Terma's Naval Decoy Launching System made to defeat coordinated attacks with multiple missiles and torpedoes. The system provides 360° coverage and effectively counters advanced threats like small range gate Radio Frequency (RF) missiles, imaging Infra-Red (IR) seekers missiles, and advanced next generation torpedoes. The system offers both an AAW capability and an ASW capability relying on NATO SeaGnat compatible combat proven 130 mm decoys.
